Overview

The **RHINO-TEC® ALUMINISED HAND SHIELD** is an essential safety accessory designed to enhance welding protection. Whether you're a seasoned welder or just starting out, this shield offers optimal defence against reflected/radiant heat, ensuring your hands and lower arms remain safe during intense welding tasks.

Key Features:

- **Additional Protection:** The aluminised surface of the hand shield effectively reflects heat away, safeguarding you from extreme temperatures.
- **Comfortable Fit:** Elasticated straps provide a secure and comfortable fit for all users, allowing you to focus on precision welding without distractions
- **Durable Construction:** Crafted with synthetic leather and an aluminised coating, this shield withstands the demands of welding work, maintaining its integrity over time.

Benefits:

- **Enhanced Safety:** Protects against reflected heat, allowing you to work confidently
- **Convenience:** Easy attachment and removal for quick adaptation to different tasks.
- **Long-Lasting Investment:** The durable materials ensures lasting performance.
